55 %

Professional Experience

E-Management | Petion-Ville - Haiti

Developer

2019 - 2021

Platform Sport Bar

Inventory management system based on a client-server architecture, consisting of an Android application dedicated to sales operations and a web-based administration interface developed with Angular.

Duties and Responsibilities

- Participated in the development of the Android application.
- Developed Angular services for communication with APIs.
- Implemented access control mechanisms, including authentication and authorization.
- Managed and handled front-end technical errors and exceptions.
- Contributed to the development of web application features using Angular.
- Analyzed user requirements and participated in designing technical solutions.

AnnParye Admin

Platform designed for the management and administration of sports betting points of sale, based on a microservices architecture.

Duties and Responsibilities

- Managed access control for application pages, including authentication, authorization, and technical error handling.
- Developed Angular services for communication with APIs.
- Contributed to the development and enhancement of front-end features using Angular.
- Participated in the design and architecture of the application based on Angular and microservices.

Interests

- Reading
- Technology watch
- Music

Other Responsibilities

- Performed corrective and evolutionary maintenance of applications.
- Analyzed user requirements and designed suitable technical solutions.
- Developed and integrated new features.
- Fixed issues and resolved software bugs.
- Organized user training sessions to ensure effective software adoption.

2023 – 2024

SOFTWARE DEVELOPMENT INTERNSHIP

Solutions S.A — Rue Babiole, Port-au-Prince, Haiti Transverse

Web application designed to centralize and manage data used by multiple internal applications within the company.

Technologies Used

ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework, Dapper, LINQ

Duties and Responsibilities

- Participated in the development of application features.
- Implemented functional requirements based on business needs.
- Contributed to the design and optimization of data processing workflows.
- Collaborated with the development team to ensure application quality and performance.

SantePam

Mobile application designed to facilitate the management of medical appointments, prescriptions, and communication between patients and healthcare staff.

Duties and Responsibilities

- Collaborated with the team to resolve technical issues and improve application performance.
- Participated in the development and integration of new features.
- Performed functional testing of the mobile application.
- Contributed to improving user experience and application stability.
- Participated in corrective and evolutionary maintenance of the application.

COMPLETED PERSONAL PROJECTS

Academic Activity Management System for Institution La Sève | 2022

Web application developed as part of my Software Engineering graduation project, designed to optimize the management of students, teachers, courses, schedules, payments, and classes. The system also supports the management of various administrative roles, including the secretary, accountant, and administrator.

Duties and Responsibilities

- Analyzed and modeled functional requirements.
- Conducted project feasibility studies.
- Designed and structured the database.
- Developed the user interface using Angular.
- Wrote the application user guide.

• ÀàZ Dictionnaire | 2023

Android application designed to search for words, their synonyms, antonyms, and English translations, with an integrated translation engine.

Technologies Used

Java, Android, Firebase Realtime Database, Firebase Cloud Messaging, Firebase ML Kit Natural Language, Google AdMob, Google Play Console, JSON

[Github - Source Code - ÀàZ Dictionnaire](#)

• Système de Gestion de Prêt | 2024

Desktop application designed to manage loans, calculate interest rates, and record repayments.

Technologies Used

Java, Java Swing, MySQL, JDBC

Architecture and Design

- Architecture MVC
- Design Pattern DAO

Demonstration

[See video demonstration](#)

- **eRead – Collaborative Digital Reading Mobile Application | 2026**

Mobile reading application that allows users to read PDF books, save notes and excerpts, store newly learned words and expressions, and add books to share with other users. The application includes an administrative validation system to ensure the quality and relevance of uploaded content.

A notification is sent to all users whenever a new book is approved and published, while the user who submitted the book receives a private notification indicating whether the book has been accepted or rejected by the eRead administration.

Technologies Used

Flutter, Supabase, PostgreSQL, Dart

Education

UNITECH | Université de Technologie d'Haïti

53, Avenue N, Port-au-Prince - Haïti

2013 - 2017

Bachelor's Degree in Computer Science

Skills

PROGRAMMING

- **Programming Language**

Java, JavaScript, C#, Python, Dart

- **Web Development**

HTML5, CSS3, XML, Bootstrap, JSON, jQuery, Java EE (JPA, JSP, Servlet), ASP.NET Core MVC, ASP.NET Core Web API

- **Mobile Development**

Android, Flutter

- **Desktop Development**

Java Swing

- **Frameworks**

Angular, Hibernate, React

- **Software Architecture and Development Best Practices**

Strong understanding of architectural principles and design patterns:

- SOLID
- Repository Pattern
- MVC
- DAO
- Singleton

DATABASES

Relational Database Management Systems (RDBMS):

MySQL, Microsoft SQL Server, PostgreSQL, Oracle

Database Skills

- Proficient in SQL (joins, functions, stored procedures).
- Knowledge of SQL commands: DDL, DML, DCL, TCL.
- Database design and modeling.
- Proficient in Conceptual Data Model (CDM) and Logical Data Model (LDM).
- Installation and configuration of DBMS: Oracle, MySQL, SQL Server, PostgreSQL.

TOOLS AND DEVELOPMENT ENVIRONMENTS

MySQL Workbench, SQL Server Management Studio, SQLite Studio, Git, Bitbucket, GitHub, Azure DevOps, Postman, Mocodo

TECHNOLOGIES USED

Firebase Realtime Database, Room, Firebase Cloud Messaging, Retrofit, Apache Tomcat, Supabase, Google AdMob, Google Play Console

Application for Software Developer Position

Dear Sir or Madam,

Graduated in Computer Science and passionate about software development, I have gained valuable professional experience as a Software Developer at E-Management. This opportunity allowed me to strengthen my technical skills and contribute to the delivery of several web, desktop, and mobile projects in a dynamic and collaborative environment.

Throughout my journey, I have also developed several personal and professional projects that have strengthened my expertise in modern development technologies. My internship at Solutions S.A. particularly helped me deepen my knowledge of application development and the design of solutions tailored to user needs.

Rigorous, self-motivated, and equipped with strong analytical skills, I am eager to join an innovative company where I can contribute my expertise to new projects while continuing to grow professionally. My adaptability, teamwork skills, and commitment are valuable assets that I would like to bring to your organization.

I look forward to hearing from you and would like to thank you for considering my application. Please accept my sincere regards.

Sincerely,

Frantzso Laguerre

UNIVERSITÉ DE TECHNOLOGIE D'HAÏTI

Diplôme de Licence

Nous, Recteur de l'Université de Technologie d'Haïti

Vu les dispositions de la constitution du 29 mars 1987 amendée sur l'Enseignement Supérieur.

Vu l'autorisation de fonctionnement octroyée par le **Ministère de l'Éducation Nationale et de la Formation Professionnelle (MENFP)**.

Vu l'autorisation de fonctionnement octroyée par le **Ministère de la Santé Publique et de la Population (MSPP)**.

Vu le procès verbal d'examens dressé par la **Faculté des Sciences Informatiques de l'UNITECH** le 10 Nov. 2021.

Vu le procès verbal de soutenance de son **projet de synthèse de fin de scolarité** en date du 06 Nov. 2021.

Sur le rapport du Secrétaire général :

Attestons que M. Frantzso Laguerre

Né(e) à Port-au-Prince le 05 Avril 1993, Département : Ouest

*a étudié à l'Unitech et a satisfait aux conditions imposées par les statuts et règlements de l'Université, lui décernons
par les présentes, le grade de **Licencié en Sciences Informatiques**, avec la mention Bien pour en jouir avec les droits et
prérogatives qui y sont attachés.*

Le Recteur

Le Vice-Recteur aux Affaires Académiques

Le Doyen

Fait et scellé à Port-au-Prince le 15 Novembre 2021
